

How I selected my region.

I applied for aws educate pack , I got approved but only got 30 dollars worth of credit .

I contacted aws support and there reply was that my institute is not a member so according to them I got appropriate credits . The problem case is still not resolved but so I created aws account through GITHUB student developer pack .

And only region supported by this account is us-east-1 as it shown in screenshot below .

The screenshot displays the Vocareum AWS Educate Starter Account dashboard. The top navigation bar includes links for Home, My Classes, and Help. The main content area is divided into two columns. The left column contains a list of frequently asked questions (FAQs) under the heading 'Please read the FAQ below to help you get started on your Starter Account.' The right column displays account details, including the remaining credits (\$100) and session time (2:25). Below the account details, there is a warning message about responsible use of the account.

Please read the FAQ below to help you get started on your Starter Account.

- What are the list of services supported?
- What regions are supported with Starter Accounts or Classroom Accounts?  
Only us-east-1 is currently supported.
- I can't start any resources. What happened?
- Can I create users within my Starter or Classroom Account for others to access?
- Can I create my own IAM policy within Starter Account or Classroom?
- Can I use marketplace software with my Starter Account or Classrooms?

**\$100**  
remaining credits (estimated)

**2:25**  
session time

Please use AWS Educate Account responsibly. Remember to shut down your instances when not in use to make the best use of your credits. And, don't forget to logout once you are done with your work!

So not much of point in doing ping test and rest.
